关于TÜV南德意志集团能效论坛

尊敬的各位领导及嘉宾：

随着全球市场竞争加剧和气候变化的影响，中国企业正面临越来越严峻的挑战以及极具变化的市场环境要求，如：能源价格不断攀升，原材料与生产运营成本的上升，以及企业的社会责任等等。如何提升能源利用效率，建立完善的能源管理制度，提升企业的竞争力和影响力已经成为企业和政府共同关注的问题。

中国政府在“十二五”规划的节能减排方针中明确了建立有效激励和约束机制，提高能源利用效率，显著减少污染物排放，确保2015年实现单位国内生产总值能耗比2010年下降16%，化学需氧量、二氧化硫排放总量减少8%，氨氮、氮氧化物排放总量减少10%等一系列的约束性目标并陆续出台了多种保障措施。

做为企业的绿色发展伙伴和知名的国际第三方技术服务公司，TÜV南德意志集团发展一直致力于为企业的可持续发展提供一站式解决方案，创享绿色价值。兹定于2012年11月15-16日在北京海航大厦万豪酒店举办《TÜV南德意志集团能效论坛》。该论坛拟邀请政府职能部门，国内外各行业专家、学者与TÜV南德意志集团相关领域工作人员共同解读工业和建筑领域的绿色能效方案及相关政策、分享实务理念及案例，为提倡节能减排，实现社会经济的绿色发展贡献己力。

特此邀请，期待您届时拨冗莅临！

顺颂商祺！

TÜV SÜD Energy Efficiency Forum

Dear Leaders and Distinguished Guests,

Increasingly intensive competition on the global market and the risk of climate change have lead to increased challenges for local enterprises. Rising costs of energy, materials, production, and operation as well the need to sustainably conduct business activity are the two biggest challenges which companies face today. To enhance global competitiveness, the public and private sectors need a feasible solution to improve energy efficiency and implement comprehensive energy management systems.

The Chinese government has committed to intensify its energy conservation and emission reduction efforts in its latest "twelfth five-year" plan through various measures including establishing an effective incentive and restraint mechanism; improve the efficiency of energy utilization; and the significant reduction of pollutant emissions. The goal is to reduce energy consumption per unit of GDP by 16%, chemical oxygen demand (cod) and the total emissions of sulphur dioxide by 8%, as well as the total emissions of ammonia nitrogen and nitrogen oxides by 10%.

TÜV SÜD, as a partner of green development, is committed to advocating sustainability as a business value-add. We would like to cordially invite you to take part in the TÜV SÜD Energy Efficiency Forum from November 15 to 16, 2012 at Beijing Marriott Hotel Northeast. At this event, you will gain valuable insights through knowledge sharing sessions conducted by government representatives, domestic and international industry experts, academic scholars and TÜV SÜD experts in related fields. The event will interpret existing green energy efficiency solutions and policies relevant to the industry and building fields, and provide you with practical advice for your sustainability strategy.

We look forward to your participation at this event.

Kind regards,

Ms. Liu Yin
